

DATASET ANALYSIS

App identification based on data volume

Huber Flores

huber.flores@helsinki.fi

Lessons learned from your work

- Summarize your work in 3 slides
 - Slide 1: Overview
 - Draw your pipeline as a workflow describing each component
 - Slide 2: Most interesting findings
 - Summarize that results that were not that obvious at first glance
 - Slide 3: Most important findings
 - From all different ways to differentiate apps, which one you considered is the most appropriate and why?

Deliverables

- A oral presentation using slides, e.g., Powerpoint, LibreOffice, among others.
- The presentation should contain
 - 1 set of questions
 - 2 set of questions
 - Lessons learned from your work (this task)
